Exterior Plywood

HARDWOOD AND BB GABOON

Hardwood Exterior Plywood is made from a range of hardwood species. It is ideal for exterior and exposed applications, and a good choice when you need an exterior product that is not marine grade.

It suits cabinetry, furniture, building, hoardings, walls, and DIY and handyman projects. It also suits bins, boxes and crates.

BB Gaboon Exterior Plywood has the same construction and glue line as our Gaboon Marine Plywood. It suits lightweight joinery, and wall and ceiling lining.

BB Gaboon Exterior does not have the British Standard marine specification of Gaboon Marine. Choose it when you need a high quality plywood but not a marine grade product.

Product Benefits

Exterior Glue Line

Hardwood Exterior and BB Gaboon Exterior both have an A-bond glue line, the bond class for exterior use.

Face Grades

Hardwood Exterior has a B grade front and a C grade back. BB Gaboon Exterior has a B grade face and a B grade back.

Sanded Both Sides

Both faces of Hardwood Exterior are sanded to produce a durable surface. Its colour varies from dark red to light blonde.

Lightweight Gaboon

BB Gaboon Exterior is durable and lightweight. Its face and back veneers are 0.8mm thick, thinner than the 1.2mm veneers of Gaboon Marine Plywood.
