

Meet Formply

CONSTRUCTION STRENGTH

Our **Formply** range is available in a number of varieties with different cores; including **Birch**, **Eucalypt** and **Radiata Pine**. The panels are manufactured using a high density (HDO) of phenolic resin impregnated paper bonded to an exterior grade plywood core.

The overlay provides a smooth surface suitable for applications such as concrete formwork as well as decorative purposes. Traditionally a black or brown overlay is used however with our Birch core we are able to offer a range of different colours such as White, Blue and Red.

Formply boasts a known structural rating, meaning it is suitable for construction projects where strength is a requirement. It is traditionally used in concrete formwork as the overlay means that it can be readily separated from concrete and the sealed edges ensure that moisture cannot enter the panel. It is also a popular product for both commercial and domestic cabinetry and furniture.

For an overview of our Formply, read more about our collection below.

Technical Specifications

Custom Sizes

We offer a standard 2400 x 1200mm size for our Plastic Faced Formply, and a 2440 x 12200mm size for our Birch Film Face, however, with our Cut To Size service we can customise your sheet to whatever size you need

Formaldehyde Free

All adhesives used in the manufacturing process of our Formply range are formaldehyde free, making it safe for use in classrooms, design studios and anywhere else you might find yourself working.

Colour Coordination

While traditional Formply comes in Black, at Plyco we offer the ability to provide White, Blue, and Red variants allowing your sheets to match your project.

Unmatched Strength

Every sheet of Plyco's Formply has a known structural rating, which means it can be used in any application that legally requires known structural strength and performance.

Formply Product Range STRUCTURAL STYLE

Plastic Faced Formply

Manufactured using a high-density overlay (HDO) of phenolic resin impregnated paper bonded to plywood.

Birch Film Face Formply

Exterior birch plywood core, overlaid with a phenolic coloured film impregnated on both faces.

Product Benefits

Knowledge Base

Combined with expert advice, we offer Formply customers a growing online platform for sharing information on applications and project inspiration.

Custom Quantities

Both a manufacturer and supplier, Plyco offers department leaders the flexibility to purchase either single, loose sheets or large packed quantities.

National Shipping

Whether you're in Scarborough or Sydney, Plyco's full range of Formply products are available for courier shipping Australia wide.

FSC Certified

All products are either from FSC Certified sources or are sourced from sustainably managed forests, as recognised by the international Forest Stewardship Council.
