Marine Plywood

DESIGNED FOR WATER AND MOISTURE

Marine Plywood is designed to handle water and moisture. Plyco stocks three panels: Gaboon, Pacific Maple and Hoop Pine AA.

A marine grade panel needs a waterproof glue, as few core gaps as possible and high quality veneers. All three panels have an A-bond exterior glue line.

Each one suits boat building. Pacific Maple also suits building and construction exposed to high moisture, inside or outside. Hoop Pine AA also suits docks and feature walls.

Gaboon and Pacific Maple come in 2440 × 1220mm sheets. Hoop Pine AA comes in 2400 × 1200mm sheets.

Product Benefits

Two Marine Standards

Gaboon and Pacific Maple are British Standard marine plywood, to BS1088. Hoop Pine AA is Australian Standard marine plywood, to AS/NZS 2272.

Lightweight Gaboon

Gaboon is a remarkably durable and lightweight hardwood plywood. Its face is A grade and its back is B grade.

Pacific Maple Colour

Pacific Maple is made from a selection of mixed hardwood species, so its colour can vary from light blonde to dark pink.

Hoop Pine Veneers

Hoop Pine AA uses the highest grade veneers in its face and core. Its species are selected for density, bending strength, impact resistance and minimal gaps.

Marine Plywood Technical Data

SPECIFICATIONS AND SIZES

Specifications

Use	Marine, boat building and exterior applications
Face grade	Gaboon: A face, B back. Pacific Maple: B front, C back. Hoop Pine AA: A face, A back, A grade core.
Standard	Gaboon, Pacific Maple: BS1088. Hoop Pine AA: AS/NZS 2272.
Glue bond	Gaboon, Pacific Maple, Hoop Pine AA: A-bond (exterior)
Formaldehyde emission	Gaboon, Pacific Maple: E1. Hoop Pine AA: Super E0.
Stress rating	Gaboon, Pacific Maple: Non-structural. Hoop Pine AA: F22.
Surface	Raw (unfinished)

Sheet Sizes

Sheet size (mm)	Grade	Thickness (mm)
2440 × 1220	Gaboon Marine	6, 9, 12, 15, 18, 25
2440 × 1220	Pacific Maple Marine	4, 6, 9, 12, 15, 18, 25
2400 × 1200	Hoop Pine AA Marine	4, 6, 9, 12, 15, 18, 24

Applications

- Boat building
- Lightweight joinery (Gaboon)
- Wall and ceiling lining (Gaboon)
- Docks (Hoop Pine AA)
- Feature walls (Hoop Pine AA)
- Wet areas (Pacific Maple, Hoop Pine AA)
- Building in high moisture areas (Pacific Maple)

Ordering and Delivery

Cut to Size

We can cut panels to size, edge band them or shape them on our CNC machine. Fill in our cut to size form for a quote.

Trade Pricing

Registered trade customers get PlyPal trade pricing on Marine Plywood. Register at plyco.com.au/pages/plypal.

Delivery

Shipping rates are calculated at checkout from your order's destination, weight and dimensions. Flat rate Local Delivery covers select Victorian regions.

Free Pickup

Pick up your order free from Plyco Fairfield or Plyco Mornington.
