

Meet Melamine

STYLE AND SUBSTANCE

Our **Melamine** product range is manufactured with two goals in mind; to endure the toughest applications, and to look good while doing it.

Melamine Panels take high-quality Particleboard or MDF and combine it with a coloured Melamine surface bonded to both sides, giving the product a sleek and pre-finished look. Melamine boards stand out with their clean, hardwearing surface, which makes it suitable for a number of different purposes.

Available in any thickness and sheet size that our regular MDF and Particle Board come in, this handy collection boasts a world of potential applications. While it's strong enough to get tough jobs done, the sleek Melamine finish means it's also suitable for cabinetry and shelving.

For an overview of all our Melamine products, read on below.

Technical Specifications

Custom Sizes

We offer a our Melamine products in a vast range of sizes and thicknesses. However, if the size you need isn't shown, we can create a custom sheet size tailored for your project via our Cut To Size service.

Formaldehyde Free

All adhesives used in the manufacturing process of our Melamine range are formaldehyde free, making it safe for use in classrooms, design studios and anywhere else you might find yourself working.

Architectural Dream

The black and white Melamine faces we bond with our MDF and Particle Board aren't just durable, they're also fashionable. Applications such as tabletops and shop fitting work perfectly with this beautiful architectural surface.

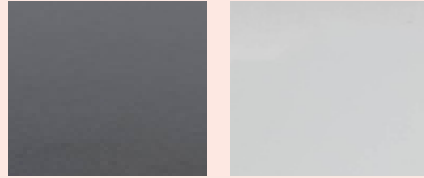

Perfect Density

Plyco's Melamine range is the perfect density, with thicknesses available from 3mm - 25mm depending on the desired product.
